

Data Protection Information

Bournville School uses a number of external services that are used by schools across the country to support students with their education. Examples are Show My Homework and My Maths which provide a useful tool for staff, students and parents to monitor and assess their work. As part of the setting up process, we share data from our school management information system including student names, year group, teacher and school classes. This is then updated automatically so that the system can change automatically if a student changes from one class to another. No sensitive personal data is used in any of these educational systems. We share data with the following companies:

- Show My Homework – online homework calendar
- My Maths – Maths resources and homework activities
- PiXL Maths App – An app for smartphones which students can use to improve their Maths skills
- Carrot Rewards – A website which allows students to keep track of the number of merit stickers they have received over their school career
- Tapestry – an App and online service for recording progress in Early Years Primary students.

If you require any additional information about these systems, please contact the school at post@bournville.bham.sch.uk
